Dedibox introduces a new generation of servers

In keeping with the Iliad Group's commitment to offering its customers the latest technological advances at the best prices, Dedibox has teamed up with Intel® to launch a new generation of servers.

Delivering twice the performance of its predecessor, the latest generation of the dedicated hosting service introduced in May 2006 now features:

- an Intel® Celeron® processor,
- a 160 GB SATA2 hard disk,
- 1 GB of DDR2 RAM,
- a very high speed 100 Mbps connection.

This service continues to be offered at the old price of **€29.99 a month exc. taxes**, with no minimum contract period.

Dedibox is also making the most of its expertise to meet the rising changes in Web hosting needs, particularly in view of the recent explosion of "Web 2.0" applications, by rolling out its new high-end "**Dedibox XL**" service, which offers subscribers a server with an exceptionally high level of reliability and performance. The service includes:

- an Intel® Core™2 Duo T7200 processor,
- 3 GB of DDR2 RAM,
- a 500-GB SATA2 hard disk,
- a very high speed 100 Mbps connection.

"Dedibox XL" is available for **€49.99 a month exc. taxes**, with no minimum contract period.

"We are delighted to be working with the Iliad Group to offer its customers the best hosting service on the market for their needs", says Jean-Marc Dubreuil, President of Intel France. "Thanks to the technological innovation of Intel and the know-how of Dedibox, this high-density server combines performance and energy efficiency in one affordable solution."

In a further innovation, Dedibox has joined forces with Microsoft® to launch "Student Pack", a special package that offers students one month of free Dedibox* access as well as the complete suite of software applications for their Dedibox server and their own PC. This software suite, provided free of charge and without time limit, includes Microsoft Windows Server 2008, Microsoft Visual Studio 2008, Microsoft Expression Studio, SQL Server 2005 Developer Edition, Microsoft Office Visio 2007 and Microsoft Office Project 2007.

"We are thrilled to be a part of this offer, which reflects our strong commitment to students and student organizations. By making most of our professional software products free and, now, offering Dedibox hosting at this special price, we give students the tools that the professionals use, making them that much more equipped to enter the business world," says Laurent Ellerbach, marketing manager at Microsoft's Platform & Ecosystem division.

Dedibox is an environmentally friendly solution, using the latest energy-saving technologies to achieve an unprecedented power consumption of less than 45W, five times lower than a standard server of similar capacity.

With these new services, Iliad confirms its commitment to making quality high-speed content the core of its network, and to offering its customers innovative hosting solutions accessible to all.

About Dedibox

Dedibox is an Iliad Group subsidiary. The Iliad Group is a major player on the French internet access and telecommunications market with Free (2,904,000 ADSL subscribers at 12/31/2007), Onetel and Iliad Télécom (fixed-line operators) and also IFW (Wimax), Online.net and Dedibox (Internet dedicated and mutualized hosting providers).
