Online launches the first dedicated server offering for less than €15 per month

Designed in collaboration with Dell, Online is launching a new generation of Dedibox servers based on innovative equipment architecture, which combine reliability, high performance and low electricity consumption. This ecological server takes no more room than a 3 ½ inch hard drive, with an average electricity consumption of less than 15 W. It is hosted in high density with up to 252 physiques servers per rack.

This offer is based on the following configuration:

- Dell XS11-VX8 server,
- Nano processor U2250 (1x 1.6 GHz),
- 2 Go RAM DDR2,
- One 160 Go hard drive,
- Very high speed 1Gbit/sec internet connection as standard.

This server supports 64 bits virtualisation and instructions as standard and meets the new needs of companies and individuals, providing them with the confidentiality, high performance and predictable cost of a true dedicated server at the same price as a virtual server.

This dedicated server offering is priced at a record-breaking **€14.99 ex-VAT per month** (installation charge: €39.99 ex-VAT), with no time commitment.

In conjunction with this offer, and in partnership with Microsoft, Online includes the Windows Server 2008 R2 Web Edition operating system for only €2.99 ex-VAT per month. *"Hosting solutions are at the core of Microsoft's strategy. The Dedibox V3 dedicated server offering is perfectly in keeping with this. With the Dedibox V3, combined with Windows Server 2008 R2, customers will benefit from a dedicated hosted web platform, available at very short notice and priced very attractively. This launch comes within the framework of an intended long-term partnership with the Online company"*, Laurent Schlosser, Telecom, Media and Service Providers Manager, Microsoft France commented.

Lastly, bolstered by the success of the "PRO" Dedibox package, Online upgraded its offering, which features a new configuration:

- Dell PowerEdge R210 server,
- Intel Xeon Nehalem L3426 processor (8x 1.86 GHz),
- 8 Go RAM DDR3 ECC,
- Storage capacity of 2x 2To on raid 0 / raid 1 hardware,
- Very high speed 1Gbit/sec internet connection,
- Dell ProSupport manufacturer's onsite support,
- Optional: 24/7 onsite support and access to the IT centre

at the unchanged price of **€99.99 ex-VAT per month** (installation charge €39.99 ex-VAT) with no time commitment.

About Online

Online, a subsidiary of the Iliad Group established in 1998, is specialised in domain name registration under the Bookmyname brand, pooled and dedicated internet hosting with Online.net and Dedibox, web platform facility management under the Iliad-Entreprises brand and lastly, the design, building and operation of IT centres via the Iliad-Datacenter brand.

About Microsoft
