About Free

Free – an Iliad Group subsidiary – is the inventor of the Freebox, the first multiservice box on ADSL. Free is behind numerous innovations in the Broadband and Ultra-Fast Broadband access segment (VoIP, IPTV, flat-rate calling plans to multiple destinations, etc.) and provides straightforward and innovative offerings at the best prices. For example, the Freebox Revolution, the 6th generation of Freebox units, includes an NAS and a Blu-Ray™ drive, and the Freebox mini 4K was the first Android TV™ and 4K box on the French market. Free was the first operator to include calls from landlines to mobile phones in its offerings and also calls to French overseas departments (DOM). Since January 2012, Free has brought mobile phone usage within everyone's reach with straightforward, no-commitment offerings at very attractive prices. Subscribers can use their Free Mobile Plan for 35 days per year and per destination (excl. 4G) when they are traveling in all European Union countries, the United States, Canada, Israel, Australia, Norway, Iceland, South Africa and New Zealand. As at September 30, 2016, Free had almost 19 million subscribers (over 6.3 million Broadband and Ultra-Fast Broadband subscribers and over 12.3 million mobile subscribers).
