About Free

Free – an Iliad Group subsidiary – is the inventor of the Freebox, the first multiservice box on ADSL. Free is behind numerous innovations in the Broadband and Ultra-Fast Broadband access segment (VoIP, IPTV, flat-rate calling plans to multiple destinations, etc.). For example, the Freebox Revolution, the 6th generation of Freebox units, includes a NAS and a Blu-Ray™ drive, and the Freebox mini 4K was the first Android TV™ and 4K box on the French market. Free was the first operator to include calls from landlines to mobile phones in its offerings and also calls to French overseas departments (DOM). Since January 2012, Free has brought mobile phone usage within everyone's reach with straightforward, no-commitment offerings at very attractive prices. The Free Mobile Plan includes all-year-round roaming communications from more than 35 countries: unlimited calls, texts and MMS from Europe, the French overseas departments, the United States, Canada, South Africa, Australia, New Zealand and Israel (to these same countries) and 25GB/month of 3G data roaming from all these countries + Mexico, Switzerland, Turkey, Algeria, Thailand and Russia. Free also includes unlimited 4G in Metropolitan France in its €15.99/month Mobile Plan for Freebox subscribers. As of March 31, 2018, Free had over 20 million subscribers (6.5 million Broadband and Ultra-Fast Broadband subscribers and 13.8 million mobile subscribers).
