PRESS RELEASE

Paris, July 12, 2024

Free's OQEE TV app now available on Apple Vision Pro

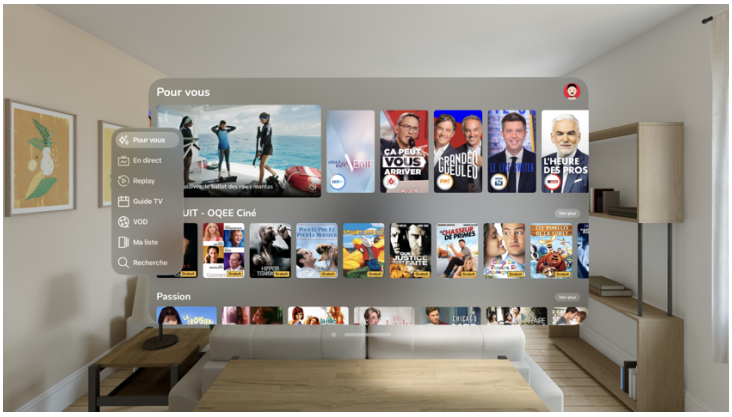

The OQEE by Free TV app is now available on Apple Vision Pro. So Freebox subscribers with the TV service and subscribers on the 5G Free Mobile Plan will be able to access OQEE by Free's TV services through Apple Vision Pro, which gives users an immersive experience, blending digital content with their physical space, powered by spatial computing.

OQEE on Vision Pro – an immersive TV experience

OQEE is the TV app created by Free for its Freebox subscribers with the TV service and 5G Free Mobile Plan subscribers who are looking for an optimal TV experience. OQEE gives them access to over 230 live TV channels, as well as a whole host of catch-up services and on-demand content.

With OQEE on Vision Pro, subscribers will be able to have an immersive, ultra-high resolution experience and enjoy the best sports, movies, series, news, music and much more, in unique conditions and wherever they are.

With the OQEE app, Free subscribers can view their TV content whenever they want, thanks to a range of functions such as live pause and rewind, start over – which lets them go back to the beginning of a program – or resume playback to pick up a program from where they left off. Freebox subscribers can also use the app to record programs and watch them later, with up to 320 hours of recording included depending on their Freebox plan.

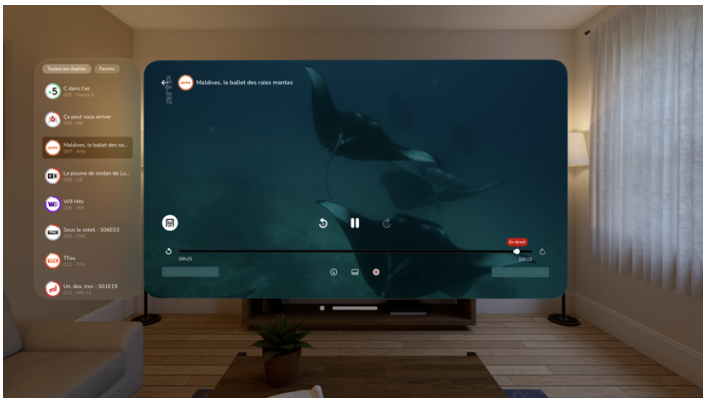

OQEE Ciné – a selection of movies and series included

Freebox subscribers with the TV service and subscribers on the 5G Free Mobile Plan can also access OQEE Ciné – **Free's unlimited no-cost streaming service**[1] – directly on Apple Vision Pro, giving them an unprecedented experience. Vision Pro lets them use hand gestures, eye tracking and voice to easily navigate and access over 500 movies and series on demand, at no extra cost, including comedies, French cinema, action movies, timeless classics and cult series. This means they can turn any space into a personal cinema screen, and thanks to OQEE they can enjoy a range of breathtaking movies and TV programs.

Simultaneous access on several screens

With OQEE, several members of the same family can watch the programs they want on different screens at the same time, live, on catch-up or on demand. The OQEE by Free app can be used on up to five screens simultaneously.

A service available as from today

To use OQEE on Apple Vision Pro, subscribers just need to download and install the app from the App Store, or by asking Siri, and then connect with their Free login and password. Thanks to this revolutionary spatial computer, subscribers will have super-easy access to all of the content offered by OQEE.

[1]Advertising-based Video on Demand (AVOD).
OQEE by Free: available for Freebox subscribers with the TV service (OQEE by Free/Freebox TV) and 5G Free Mobile Plan subscribers. OQEE by Free app available on the Free 4K TV Player or on compatible devices (by downloading the app from the App Store, Google Play, the LG Store or the Samsung Galaxy Store and creating an account), and online at https://oqee.tv//. Access to OQEE by Free TV services and advanced features available depending on the subscriber's plan and devices. Catch-up TV: access to a selection of programs and subject to availability. About Free

Free – the inventor of the world's first triple-play box – is a Fixed and Mobile Ultra-Fast Broadband operator in France, standing out for its innovative, straightforward and attractive offerings. At end-March 2024, it had 22.7 million retail subscribers (15.2 million Mobile subscribers and 7.5 million Fixed-line subscribers). Free is a subsidiary of the iliad Group, which was created in France in the early 1990s and now also operates in Italy under the iliad brand and in Poland under the Play brand. In March 2021, the iliad Group launched its BtoB business in France under the Free Pro brand.
