

Paris, May 11, 2016

**The Iliad Group has filed an application
for the allocation of 3G and 4G spectrum in
French overseas departments (DOM)**

As part of the auction launched by the French electronic communications regulatory authority (Arcep) for 3G/4G spectrum in the French overseas departments, the Iliad Group has submitted applications to be a mobile operator in Guadeloupe, French Guiana, Reunion Island, Martinique, Mayotte, Saint-Barthélemy and Saint-Martin.

The application for Reunion Island and Mayotte has been submitted via the company Telco OI, in which Iliad is a joint shareholder with the Axian group (formerly the Hiridjee group).

Iliad's aim is to provide users in these territories with straightforward, innovative offerings at attractive prices, as it has already done through Free Mobile in Metropolitan France. This would benefit consumers and bring mobile phone usage within everyone's reach by putting an end to the totally unjustifiable price discriminations that currently exist in the French overseas departments.

The Group would invest around €100 million in the rollout of its services in these territories.

About Iliad

Iliad is the parent company of Free, the inventor of the Freebox, the first multiservice box on ADSL. Free is behind numerous innovations in the Broadband and Ultra-Fast Broadband access segment (VoIP, IPTV, flat-rate calling plans to multiple destinations, etc.). Free provides straightforward and innovative offerings at the best prices. The Freebox Revolution, the 6th generation of Freebox units, notably includes an NAS and a Blu-Ray™ drive. Free also offers the Freebox mini 4K, the first AndroidTV™ and 4K box on the French market. Free was the first operator to include calls from landlines to mobile phones in its offerings and also calls to French overseas departments (DOM). Since January 2012, Free has brought mobile phone usage within everyone's reach with straightforward, no-commitment offerings at very attractive prices. Since July 2015, subscribers can use their Free Mobile Plan for 35 days per year and per destination (excl. 4G) when they are traveling in all European Union countries and, since September 2015, the United States. As at December 31, 2015, Free had nearly 18 million subscribers (6 million Broadband and Ultra-Fast Broadband subscribers and 12 million mobile subscribers).
